

ALLIANZ MULTINATIONAL FOR MID-SIZED COMPANIES

FACT SHEET

YOUR BUSINESS MAY BE READY TO TAKE ON THE WORLD, BUT IS YOUR INSURANCE PROGRAM ON BOARD?

International expansion has become an economic necessity, but for mid-market companies, the lack of familiarity with new markets provides far-reaching risk management challenges.

If you have business activities outside your domestic territory, an International Insurance Program (IIP) can deliver a comprehensive, consistent and compliant solution that covers all the main risks in a cost-effective way.

Consider these benefits (the 4C's):

- 1 Compliance**
 Across the globe, there are different admitted and non-admitted rules, insurance and tax law peculiarities. Penalties for violating local regulations can include unanticipated tax charges, fines, loss of business license or reputational damage. A global program ensures that policies and centrally provided services comply fully with local regulatory and tax considerations.
- 2 Coverage**
 A piecemeal approach to insurance buying might mean having to accept second-best when it comes to coverage. But a structured program discussion ensures key risks are better identified, quantified, and that coverage is tailored to match. Plus, bringing together coverages across borders means fewer claims "headaches" when you need them least.
- 3 Control**
 An IIP brings insurance placement, risk management, and claims processes across all locations under centralized administration. This coordination provides transparency and oversight to ensure effective quality control.
- 4 Cost**
 Applying consistent standards to global risks brings about a better risk-retention/risk-transfer balance. Furthermore, the pooling of comprehensive risk information creates the opportunity for better underwriting review and greater pricing transparency.
