

# INSURANCE ACROSS BORDERS

## ALLIANZ MULTINATIONAL

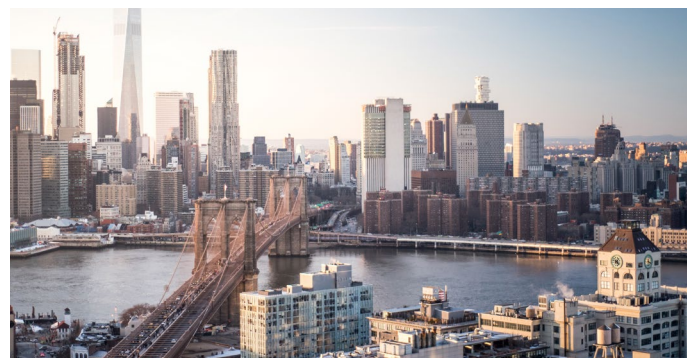

In a global economy, international businesses require robust global insurance solutions. As companies expand into new and emerging markets and as increased regulation makes corporate governance an imperative, the modern day risk manager will seek to improve efficiency within the context of a globally coordinated insurance program. At Allianz Global Corporate & Specialty (AGCS) we are well versed in providing international insurance programs which are tailored to the individual needs of every corporate client, wherever and whenever your business.

The Allianz producing office in a company's domicile acts as the program coordinating point. Typically, a program will combine a global master cover providing umbrella protection over and above underlying local policies. While the precise program structure depends upon each client's footprint, AGCS works to build a solution that meets local regulatory (admitted / non-admitted), legal and tax requirements. Compliance peace of mind is a key component of our offering.

## WORKING WORLDWIDE AS A TEAM TO DELIVER THE HIGHEST QUALITY PROGRAMS

We combine high quality insurance coverage, risk management and claims services in one package and dedicated program teams are there to proactively support clients and brokers.

Successful global program implementation depends upon an effective international network. We have an extensive global footprint which combines Allianz owned entities and network partners who are carefully selected to pass our rigorous quality standards. Our clients demand the best local representation and our truly worldwide reach ensures that they can have easy access to the full range of Allianz services – from policy issuance in local language and speedy cash handling to seamless claims and risk management support.

## CLEAR COMMUNICATION, SMOOTH IMPLEMENTATION

With so many programs under lead management across different lines of business, AGCS recognizes that clear communication and information exchange between our offices and with our clients are fundamental to the successful implementation of an international insurance program. The Allianz Global Program System (Allianz GPS) has been designed to deliver streamlined processing between producing and local offices and is used to accurately track the implementation of local policies, cash-flow and claims processing during the lifecycle of the program. Implementation status can be regularly shared with clients and brokers alike. We are committed to continuous improvement by way of customized service charters which include defined service level agreements and key performance indicators.

To learn more about how AGCS can help with your international insurance needs, please contact your local AGCS account management team or visit our website at [www.agcs.allianz.com](http://www.agcs.allianz.com)
