1. ALLIANZ GROUP RESULTS 9M 2020
Allianz has delivered solid results in an environment that will remain challenging. “We remain confident to not just weather the COVID-19 crisis but to build an even stronger Allianz for the benefit of all stakeholders”, says Allianz SE Chief Executive Officer Oliver Bäte.

In the first nine months of 2020, total revenues declined by 1.9% to €104.9 billion (9M 2019: €106.9 billion). Operating profit dropped by 14.6% to €7.8 billion (9M 2019: €9.1 billion), mostly due to adverse impact from COVID-19 of €1.3 billion. The drop in net income attributable to shareholders of -17.6% to €5.0 billion (€6.1 billion) was largely driven by the decrease in operating profit. The Solvency II capitalization ratio was at 192% at the end of the third quarter of 2020 (end of Q2 2020: 187%).

In the Property-Casualty insurance segment, total revenues increased by 1.4% to €46.7 billion euros (9M 2019: €46.1 billion). Adjusted for foreign currency translation and consolidation effects, internal growth fell 0.9%. Due to a significantly lower underwriting result, heavily impacted by COVID-19, as well as a lower operating investment result, the operating profit deteriorated by 16.6% to €3.5 billion (9M 2019: €4.2 billion) partly offset by a strong improvement in expense ratio. Overall, the combined ratio for 9M 2020 worsened by 1.9 percentage points to 96.0%.

In the Life/Health insurance business, the present value of new business premiums decreased to €42.5 billion (9M 2019: €49.0 billion). Operating profit went down to €2.9 billion (9M 2020: €3.4 billion).

In Asset Management, operating profit rose by 2.2% to €1.996 billion (9M 2019: €1.954 billion). Third-party assets under management decreased to €1,670 billion by €19 billion compared to year-end 2019.

2. AGCS\(^1\) RESULTS 9M 2020
In the first 9M of 2020, AGCS gross premium written grew by 5.7% to €7.549 billion (9M 2019: €7.142 billion) due to strong performance in the Capital Solutions line of business with higher premiums flows from capital market partners. AGCS continued to see strong rate increases of 22% on average across its portfolio (for renewal and new business). Primary increases are observed in Aviation and Property, but also in Liability and Financial Lines.

AGCS GPW 9M 2018-20

The combined ratio for 9M 2020 stands at 112.7% (9M 2019: 101.2%), largely attributed to COVID-19 claims particularly in the Entertainment segment. The unfavourable loss ratio development is partly mitigated by an improved expense ratio benefiting from top line increase, cost savings and reduced travel expenses. Excluding COVID-19 claims impact of €493 mn, the combined ratio would stand at 100.4%.

AGCS’ 9M 2020 operating loss of €257 million (9M 2019: profit of €250 million) is €507 million below prior year driven by lower underwriting result and investment income. Excluding the impact from the global pandemic, operating profit would be €269 million which is €19 million above prior year.
