Allianz Global Corporate & Specialty

12M 2021 Results update

Briefing February 2022

This document summarizes the financial results for the full year 2021 (“12M 2021”) for Allianz Global Corporate & Specialty (AGCS) as well as for Allianz Group, which were announced on February 18, 2022.

Further information
Full details of Allianz Group results for 12M 2021, including the analysts’ presentation, are available at Allianz Group’s Investor Relations web pages.

1. Allianz Group results 2021
Allianz Group posted strong operating results in all business segments for 2021. “With record-high operating profit, strong value growth in life, health and asset management businesses and strongly improved P/C margins and productivity, we are scaling the power of our global franchise”, said Allianz CEO Oliver Baete.

Total revenues increased 5.7% to €148.5 billion in 2021 (12M 2020: €140.5 billion). Operating profit jumped by 24.6% to €13.4 billion (12M 2020: €10.8 billion). The Solvency II capitalization ratio was at 209% at the end of 2021, compared to 207% at end of 2020. Net income attributable to shareholders declined 2.9% to €6.6 billion as a result of a one-time pre-tax provision of €3.7 billion in anticipation of settlements with major investors in the Allianz GI U.S. Structured Alpha funds.

In the Property-Casualty segment, total revenues increased to €62.3 billion (12M 2020: €59.4 billion). Internal growth¹ was at 4.1%, mostly driven by Allianz Partners, AGCS and Australia. Operating profit rose 30.6% to €5.7 billion (12M 2020: €4.4 billion). Combined ratio improved by 2.5%-p to 93.8% (12M 2020: 96.3%) despite high claims impact from weather events “due to our continuous focus on underwriting discipline and productivity improvements”, said Allianz Chief Financial Officer Giulio Terzariol.

In the Life/Health insurance segment, the present value of net business premiums increased to €78.7 billion (12M 2020: €61.5 billion). Operating profit rose to €5.0 billion (12M 2020: €4.4 billion).

In Asset Management, operating profit grew by 22.3% to €3.5 billion (12M 2020: €2.9 billion). Third-party assets under management rose to €1.966 trillion – an increase of €255 billion or 14.9%, compared to year-end 2020.

2. AGCS¹ results 12M 2021
In 2021, AGCS delivered on its strategic goals and returned to profitability, following a portfolio remediation to secure the basis for future sustainable growth.

AGCS’ 2021 gross premium written increased year-on-year by €174 million to €9,486 billion (12M 2020: €9,312 billion). The positive impact from effective rate changes of 18% for renewal business (adjusted for terms and conditions), a higher renewal base and new business have more than offset selected corrective underwriting actions targeting unprofitable accounts and segments.

AGCS GPW 12M 2019-21

The combined ratio for 2021 stands at 97.5% (2020: 115.5%), which is 18.0%-p better than prior year. While AGCS achieved a positive underwriting result, it has seen significant claims impact from natural catastrophes and also losses from Covid-19 (reserves booked amounted to approx. €100 million in 2021 compared to €521 million for the same period in 2020). This result reflects AGCS’s focus on volatility management as well as the benefits of a new reinsurance structure.

AGCS’ 2021 operating profit of €366 million (2020: operating loss of €482 million) is €848 million above prior year driven by a significantly lower impact from Covid-19 losses and an overall positive underwriting performance.
